Retaining glazing is a true achievement in the field of architecture and construction of swimming pools. It creates great opportunities for the implementation of unique architectural and design solutions.

High quality and guarantee. Acrylic is an extremely durable and transparent material. Thanks to these features, it is ideal for retaining glazing of transparent pools. Correct calculation of the thickness of the acrylic block and professional assembly by AQUA & ACRYL, as well as high-quality compatible materials for air-tight sealing, guarantee that the transparent pool will serve for a very long time.

AQUA & ACRYL gives a 10-year guarantee for the airtightness of the transparent pool and absolute guarantee for the resistance of the acrylic to chlorine and sea water.

The acrylic manufacturer Evonik Röhm guarantees perfect transparency and color retention for 30 years.

Unique beauty. The transparent acrylic panel noticeably increases the panorama of vision and gives a unique beauty to your pool. The panel is completely invisible in water. It gives the impression that the water is standing in the air. It is an unbelievable sight.

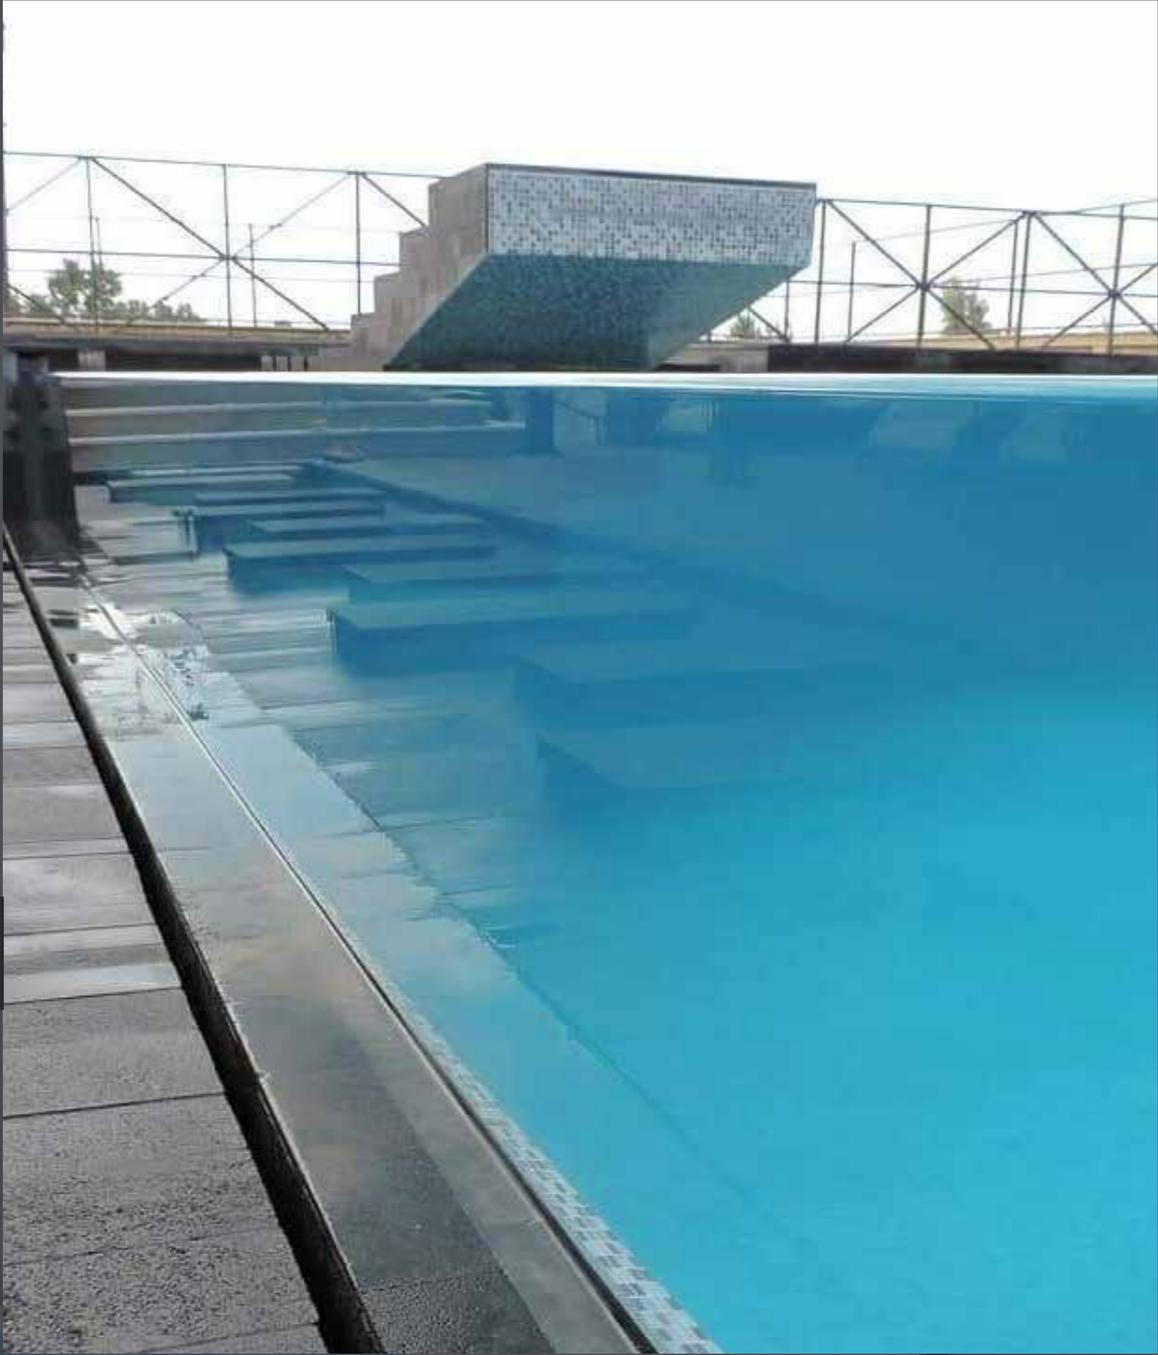

The transparent pool looks incredibly interesting, it adds a truly unique view to your home, hotel, SPA or club.

Acrylic panels can be bent and glued to create complex shapes that will match the style criteria of your interior.

Profitable investments. Nowadays, real estate is the best investment. You can increase the value of real estate on the market thanks to its unique design. The glass pool will lead the property portfolio. With such an exclusive element of the interior as a glass pool, you will attract the attention of a potential buyer who will pay the amount you specify.

Aquariums

Why should the aquarium be acrylic?

Transparency. Whichever shape you choose, acrylic aquariums have a high degree of transparency. The light transmittance of acrylic is 92%. Today it is the most transparent material in existence, even more transparent than glass. For the construction of aquariums and oceanariums, acrylic is the perfect choice.

Security. In the same thickness, acrylic is able to withstand much greater water pressure than ordinary silicate glass. An important feature of the acrylic aquarium is high impact resistance. If there are small children in the house or if you plan to put up a large aquarium in a public space, it is advisable to install acrylic aquarium.

Lightness. Acrylic aquariums have a much lower weight compared to ordinary glass aquariums, which significantly reduces the load on the ceiling, facilitates transport and installation.

Moldable. Acrylic can take absolutely all forms, because it has a high plasticity under the action of low temperatures.

Thin seams. When creating large acrylic aquariums, the blocks are glued together at the molecular level, thus creating strong and completely invisible joints. It is possible to polish scratches on the acrylic aquarium surface. Unlike glass, where scratch removal is impossible.

Durability. Acrylic is a durable material. The manufacturer gives a 30-year warranty under normal use. Acrylic withstands temperature changes, all weather conditions, mechanical and optical degradation. When glass is strengthened with triple gluing, it begins to delaminate over time, which is not the case with acrylic over its lifetime

Furniture
from acrylic

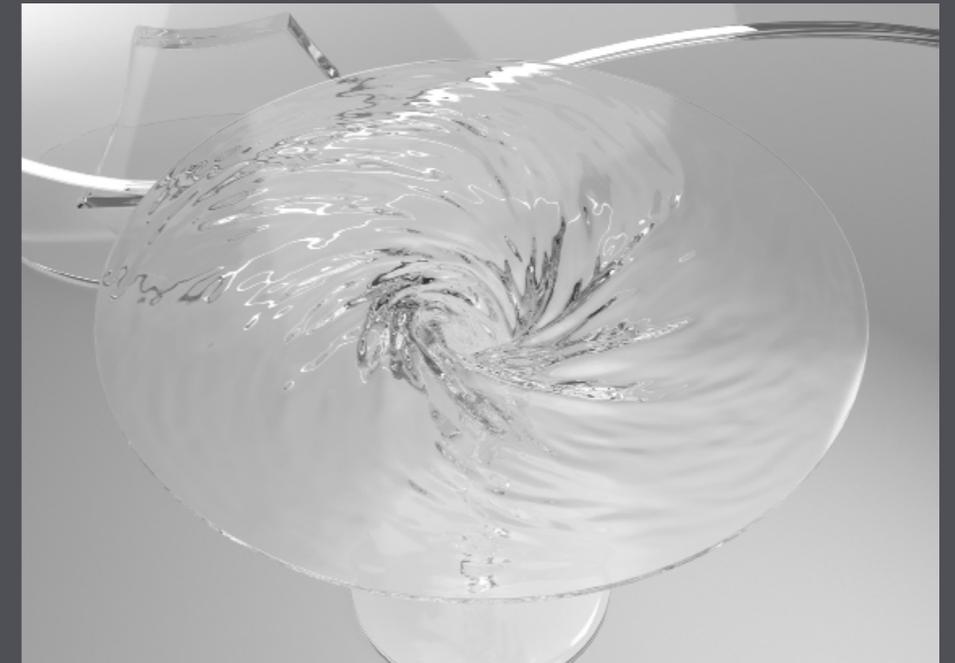

Lightness. Due to its transparency, acrylic furniture does not give the impression of a collapsed interior. It makes interior functional. Transparent furniture is visually light. The feeling of lightness it gives will make you not pass by indifferently.

Style. The question is often asked: "what style of furniture will be appropriate?" to which we reply: "in everyone!". Without having its own color, transparent furniture takes on the color of the interior. As if highlighting it. The style of the interior is determined only by the shape of the objects: soft lines in the modern style, a shapely rococo figure or simple hi-tech surfaces.

Luxury. Transparent furniture is a sign of good taste. The play of colors on the absolutely glossy surface emphasizes the character of acrylic furniture. It is practical, always looks stunning and does not lose its style and elegance even with the passage of time. Most often, luxurious acrylic furniture is made by order, taking into account all the customer's needs, and this literally becomes customer's pride.

DE sign LUXE class. We offer a unique, patented design of transparent acrylic furniture from AQUA & ACRYL. We can create an exclusive, your own design for you. We are also happy to produce transparent acrylic furniture elements according to customer sketches. Acrylic furniture can be both transparent and colored. Such furniture can be emphasized with the help of backlighting or milled drawings. Acrylic combines well with other materials, such as: acrylic stone, glass, stainless steel, brass, bronze, wood, natural stones and textile materials. The results of such combinations exceed all expectations.

Furniture from acrylic

The unique "On the wave" lounge is made of transparent acrylic and is the embodiment of the AQUA series idea from AQUA & ACRYL

Lightness - visually, the deckchair is almost non-existent, you just lie on the wave.

Durability - the structure is delicate in appearance, but nevertheless very durable. It easily supports two people with a total weight of 150 kg.

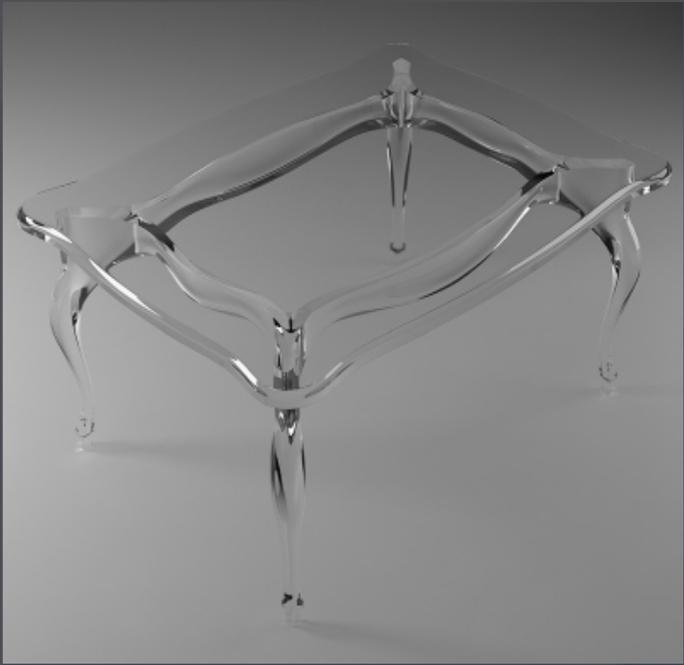

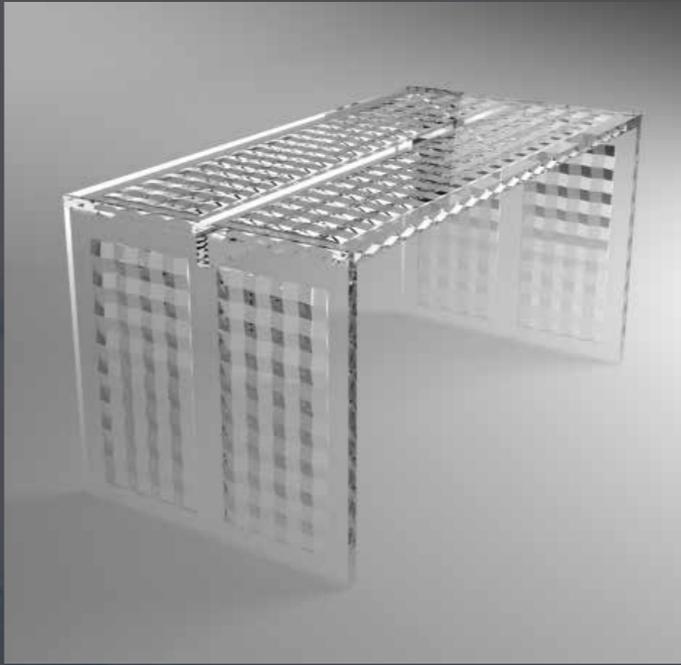

Ergonomics - pleasant to the touch material, rounded slants, comfortable body position. They will give you a lot of pleasure.

The main idea was achieved thanks to the location of the structure on one support, the transparency of the acrylic and the smooth forms "On the wave".
